DETAILED ACTION

Terminal Disclaimer

1. The terminal disclaimer filed on 06 March 2006 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of pending Application Number 11/180,395 has been reviewed and is NOT accepted.

The filing date listed on the Terminal Disclaimer is incorrect. The Terminal Disclaimer lists "October 24, 2000" as the filing date of pending Application Number 11/180,395; however, the actual filing date is --July 13, 2005--.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., In re Berg, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); In re Goodman, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); In re Longi, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); In re Van Ornum, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); In re Vogel, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and In re Thorington, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned

with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 2, 4 and 8 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 4 of copending Application No. 11/180,395 ('395). Although the conflicting claims are not identical, they are not patentably distinct from each other.

'395 discloses the claimed apparatus for compressing oxygen-enriched gas, comprising: a concentrated oxygen source having oxygen-enriched gas therein (claim 1, line 4), said oxygen-enriched gas contains at least 50% by volume (claim 4, lines 6-8);

a radial piston compressor (claim 1, line 14) operatively connected to said oxygen source (via storage and buffer tank) to receive the oxygen-enriched gas therefrom, said radial compressor being capable of compressing said oxygen-enriched gas to a high pressure (claim 1, lines 15-16);

and a high-pressure storage container (claim 1, line 17) for portable storage of said highpressure oxygen-enriched gas;

wherein said oxygen-enriched gas is prioritized by a portion thereof being capable of being fed to a person (claim 1, lines 7-9) and a portion thereof being capable of being fed to said radial compressor (via buffer tank; claim 1, lines 10-12), said prioritization includes a determination of a minimum oxygen concentration of said oxygen enriched gas by an oxygen sensor and the operation of said radial compressor being terminated when said enriched

Application/Control Number: 09/695,612

Art Unit: 3743

oxygen gas is below a predetermined oxygen level (claim 1, lines 17-21 and claim 4, lines 2-6).

Regarding claim 4, termination of said radial compressor results in termination of flow of oxygen-enriched gas to the high-pressure storage.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

4. The examiner has attempted to identify all related and associated patents and applications that may be subject to a double patenting rejection. Applicant is invited to make any other known applications available to the examiner for consideration.

Applicant identified U.S. Patent Number 6,302,107 as a related patent of interest. The examiner has reviewed this patent, and it does not contain any double patenting issues.

Allowable Subject Matter

- 5. Claims 3, 5, 7, 9 and 23-24 are allowed.
- 6. Claims 6, 10, 28-34 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to

Art Unit: 3743

37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Amanda F. Wieker whose telephone number is 571-272-4794. The examiner can normally be reached on Monday-Thursday, 7:30 - 5:00 and alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Henry Bennett can be reached on 571-272-4791. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
